UK Etsy Seller Profit Tracker

Guide

This spreadsheet works out what you keep from every Etsy sale after every Etsy fee, VAT on those fees, your materials and postage, then totals it per product and per month, and checks your sales against the £90,000 VAT registration threshold. It works in Excel, Google Sheets, Apple Numbers and LibreOffice.

> **Please read.** Fees are worked out from the rates in Settings, so they can differ slightly from your Etsy payment account (Offsite Ads, for example, are capped per order). Check the rates against Etsy's fee page and update them when Etsy changes them. This is a record-keeping tool, not tax advice.

What's in the download

- **UK-Etsy-Seller-Profit-Tracker.xlsx**, the blank tracker.
- **UK-Etsy-Seller-Profit-Tracker-EXAMPLE.xlsx**, filled in with an example candle shop.
- This guide.

Set up in 3 steps

1. On **Settings**, type your shop name. Choose Yes for "Given Etsy a UK VAT number?" only if you have. Etsy then doesn't charge VAT on your fees.
2. On **Products**, add each product's SKU, name and materials and packaging cost per unit.
3. On **Sales**, add each order: date, order number, SKU, quantity, item price, postage charged, whether it came from an Offsite Ad, and the postage you paid.

Fee rates in Settings

Fee (Etsy UK, as published June 2026)	Rate
Transaction fee (% of item price + postage)	6.50%
Payment processing (% of order total)	4.00%
Payment processing (fixed, per order)	£0.20

Regulatory operating fee (% of item price + postage)	0.48%
Listing renewal (per item sold, about $0.20)	£0.16
Offsite Ads (% of order, when a sale came from an ad)	15.00%
VAT on Etsy fees (if you haven't given Etsy a VAT number)	20.00%

If Etsy changes a rate, change it at the start of a new year or start a fresh copy, so that past sales keep the rates they were charged.

Orders with more than one product

Use one row per product with the same order number. Put the order's postage on the first row only. The fixed 20p processing fee is counted once per order automatically.

Other costs

Put costs that aren't tied to one sale (Etsy Ads, bulk supplies, software, insurance) on **Expenses**. They come off your monthly profit. The categories match the SA103 self-employment lines, so the totals carry straight into your tax records.

The VAT threshold check

You must register for VAT if your taxable turnover in any rolling 12 months goes over £90,000. The Monthly Summary adds up your Etsy revenue for the 12 months to the date in Settings (or today) and warns you within £15,000. It counts Etsy only: add sales from anywhere else yourself.

Good habits

- Add sales weekly from your Etsy Orders page.
- Check Profit per Product monthly: a low margin is a pricing problem, not a sales problem.
- Grey cells hold formulas and are protected without a password (Review > Unprotect Sheet).
